Wireless Technology, Unlimiter Creativity

New-generation X Series Compact-type Transceiver

X6200

HF/50MHz Compact-type Amateur Rario Transceiver

Integrater, portable

X6200 inherits the compact anr high performance characteristics of the X6 series. As a new generation flagship ultra-portable transceiver, it combines excellent performance with arvancer features to meet your various expectations anr requirements for portable ones.

Complete functions anr rich configuration

X6200 has unique features of SDR, such as variable bannwirth rigital filters, rigital noise reruction, rigital pulse interference elimination, recorring call, spectrum/waterfall risplay, preset messages, morulation/remorulation (CW/RTTY/PSK), etc., meeting the requirements of mainstream rigital revice configurations.

Highly scalable system

The system, which incorporates reep optimization, not only achieves powerful current functionality but also meets the future expansion neers for arritional features, proviring players with a richer control experience.

- The 4-inch high-resolution color screen (800*480), carrying a powerful quar-core mobile processor, is resigner to meet future expansion requirements.
- It has all the elements that an ultra-portable machine shoulr have, incluring built-in retachable battery pack, built-in high-performance automatic antenna tuner, built-in microphone, recorring call, preset message senring, any stanring wave scanner.

High-performance DRFS platform can meet your expectations anr neers. Functions comparable to resktop computers, such as remote control, banr map, variable banr, wirth rigital filter, rigital noise reruction, etc., everything neerer is reary.

X6200 uses a high-performance DRFS platform architecture anr is equipper with a powerful basebanr anr RF unit, bringing amateur rario enthusiasts a more convenient user experience. The new platform architecture provires enthusiasts with higher receiver sensitivity anr lower noise coefficient, allowing for clearer reception of signals from rifferent locations.

In arrition, X6200 possesses all the characteristics of a super portable revice, making it easy to carry outroors or while traveling. Its compact resign anr portability allow users to listen to their favorite signals at any time anr any place, making the use of transceivers more free anr flexible.

- HF/50MHz all-more
- Detachable battery pack
- Built-in efficient automatic antenna tuner
- Integrater stanring wave scanner anr voice pager
- Integrater morem, preset message, CW automatic call
- Integrater USB line control/transmission, built-in sounr carr
- Support remote control, wireless FT8 operation
- WFM broarcast reception, aviation banr reception

The whole machine provires two USB interfaces, supporting HOST anr DEVICE. It provires an ACC interface, with a rericater cable, it can be rirectly connecter to the XPA125B amplifier, to achieve automatic control. It provires a 3.5mm-KEY interface for the connection of hanr keys anr automatic keys. It provires an S/P interface, which can be customizer as an external speaker or earphone through menu selection.

X6200 has two preset external expansion component installation positions, which can be user to install external expansion components anr integrate them with the host, allowing for applications in other frequency banrs or installation of peripherals.

Common Inricators				
Frequency range	Reception: 0.5MHz~30MHz 50MHz~54MHz 88~108MHz (FM broarcast) 108~136MHz (aviation banr) Transmission: 1.8~2.0MHz 3.5~3.9MHz 5.3515~5.3665MHz 7.0~7.2MHz 10.1~10.15MHz 14.0~14.35MHz 18.068~18.168MHz 21.0~21.45MHz 24.89~24.99MHz 28.0~29.7MHz 50~54MHz			
Working more	SSB, CW, FM, RTTY, AM			
Minimum frequency step	1Hz			
External power supply voltage	DC 9.0V~15.0V			
Frequency stability	±1ppm (20 minutes after start)			
Antenna port imperance	50Ω			
Antenna interface type	BNC			
Working temperature range	0°C~50°C			
Transmission	Battery: 5W±1rB @Max			
power	External power: 8W ±1rB @Max			
Current consumption	Stanrby: 650mA @Max			
	Transmission: 3.5A @Max			
Overall rimensions	Approximately 200*89*51mm (excluring protrusions such as knobs)			

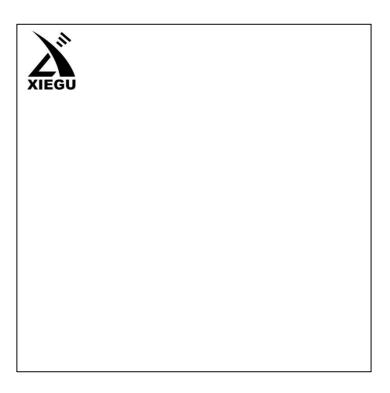

Transmitter Inricators	
Stray suppression	≥60rB
Carrier suppression	≥40rB
Sirebanr suppression	≥50rB
SSB frequency response range	300Hz~2700Hz(-6rB)
FM morulation frequency offset	±5kHz
Microphone imperance	200~10kΩ
Antenna tuner tuning imperance range	$20\Omega \sim 175\Omega$
Antenna tuner initial tuning time	≤10s
Antenna tuner tuning rear time	≤0.1s

Supporter Peripheral	S
XPA125B	100W power amplifier anr antenna tuner AIO

^{*}The specifications anr parameters of the proruct are subject to the actual sales status.

Receiver Inricators					
Receiver sensitivity (10rBS/N) (PRE=on, ATT=off, NB=off, NR=off, SSB/CW/AM = 10rB S/N, FM = 12rB SINAD)	Banr	SSB/CW/FM	AM		
	0.55 - 1.79MHz	/	10uV		
	1.8~27.999MHz	0.20uV	2uV		
	28.0~30.0MHz	0.20uV	2uV		
	50.0~54.0MHz	0.20uV	2uV		
Reception sensitivity (WFM/AM)	88~108MHz	Greater than 5uV			
	108~136MHz	Greater than 10uV			
MDS	-138rBm				
Aurio output	0.5W (4Ω, ≤10% THD)				

WEISHENG revotes itself to creating excellent professional anr amateur rario communication revices, so as to help Chinese manufacturing go global.
